

GOLD & JEWELRY DIRECT

ABOUT US

Albert Kraus (Owner) works personally with all clients to help them create wealth and protect their assets. He has 38+ years experience and knowledge in dealing with U.S. coins.

NUMISMATIC (RARE COIN) INTRO

During uncertain times, shifting savings and investments into rare coins provides security. Rare coins are among a handful of financial assets that do not rely on an issuer's promise to pay. They are tangible assets with worldwide value. They offer investors refuge from default risk. They can provide a buffer against extreme market movements or collapse. Best of all, they have consistently outperformed traditional investment markets.

LOCATIONS

130 S. Main St.
Algonquin, IL 60102

460 W. Virginia St. (RT 14)
Crystal Lake, IL 60014

- Learn what rookie mistakes to avoid
- Learn the secrets of silver investments
- Leverage inflation
- We share powerful investor knowledge

WHY INVEST IN NUMISMATIC COINS

- **Solid Value at Current Levels:** No one is certain what the future holds, but, as with stocks a critical strategy in acquiring common-date gold is value. We only recommend coins that we're convinced offer not only excellent long-term upside potential to their previous all-time highs, but also look undervalued in today's changing marketplace.
- **Scarcity:** Numismatic coins are, by their nature, becoming harder to find every day. Therefore their value is likely to increase substantially over time. The number of coins originally issued (mintage) is not always an accurate indication of scarcity. It's the interplay of demand with the remaining supply that determines scarcity. Population reports also help indicate monthly changes in a coin's scarcity or "survival" rate.
- **Consider Probability:** Literally millions of dollars in rare coins would fit nicely into a small box or safe. Storage is very simple.
- **Consider Simplicity:** Investors at any level already have a very busy plate; a numismatic investment is not complete. In fact, it's one asset that you can actually enjoy! It's something tangible that you can hold. Rare coins are a management-free investment. No daily buy/sell decision. No need to worry about interest rates, GNP, balance of trade deficit, and a plethora of other economic problems.
